

**Training Schedule offered in mode:** Biannual

**Estimated training time:** 3 hours

**Suggested participants:** Sales and Presales

**Scope:** General description of the characteristics of each product (does not include certification exam). For Official Training please review suggested training proposal by our Education Area. Adistec is a VMware Authorized Training Center.

---

## **Content:**

### **vSphere, VSAN & Disaster Recovery**

- vSphere Hypervisor main features.
- vSphere 6 Hypervisor main features.
- Components: Replication with vSphere & Data protection.
- VMware VSAN: Main features. Why VSAN should be incorporated into projects.
- VMware SRM: Main characteristics and requirements.

**Conclusion:** With an example of a DR project based on "vSphere Replication", "VSAN" and "VMware SRM", including the estimated vCAN points consumed.

### **NSX**

- General description and main characteristics.
- Hybrid networks between Service Providers and the Customer Data Center. What components should be considered.
- Real cases based on "vCAT-SP". Sending links with project documentation.

**Conclusion:** With example of a project with a hybrid network, including the estimated vCAN points consumed. Demonstration: How to reduce costs and delivery time of virtualized environments thanks to NSX.

## **vROps & LogInsighth**

- General description and main characteristics.
- Operations services and advanced monitoring.
- Troubleshooting and root cause analysis.
- Extensibility: Monitoring of S.O, Applications and devices ("Management Packs", "Content packs", "Plug-ins", etc.).
- Visualization / Multi-client access and accesses based on Roles.
- Capacity management and reports.
